

**Rubrics from Boenninghausen's Therapeutic Pocket Book**, numbered according to the input codes for the Polarity Analysis Software (Boenninghausen Direkt). This list is provided for the benefit of English language developers of patient questionnaires. Compiled in 2011 by Dr Russell Malcolm. An editable rtf file is available on application.

NB The Mind section below contains modern colloquial alternatives to the original rubric terminology to help developers create accessible and understandable patient forms. The first keyword under any given input number is the original term used by the PA software.
